

SAMVITA - Transforming Primary Healthcare in India

About SAMVITA

SAMVITA – A Point of Care Device (POCD) is an unique human vital pre-screening mobile kit for carrying on-spot routine health-checks close to where people live, promises to give India's Primary healthcare industry a new lease of life.

Developed by Bengaluru-based Wrizto Healthcare Pvt. Ltd., a subsidiary of Wenzins Technologies (I) Pvt. Ltd., SAMVITA diagnostic kit is a simple, easy-to-carry digitized tele-mobile briefcase that helps people residing in the interior regions where medical facilities are easily accessible.

SAMVITA Healthcare Kit supports over 18 basic primary vitals diagnosis and by adding various blood analyser modules, it is also capable of diagnosing 51+ blood borne vital test parameters with an instant vital report and video consultation.

This intelligent diagnostic platform fills the gap in regions with a shortage of Healthcare facilities. SAMVITA provides easy access to health-checks with referral support and telecare facility to enable continuity of care.

What's more?

SAMVITA not only helps in expediting diagnosis but reduces the cost and time. It helps doctors and healthcare professionals to check and detect the diseases even on the go. This FDA / CE and ICMR certified system is a Portable Mini-Lab setup and also handy.

SAMVITA diagnostic kit not only makes people more comfortable in getting a test done wherever they are, but the service comes at an affordable cost than standard charges.

Experts at Wrizto Healthcare and Wenzins have developed this cloud-based architecture with a 3-layer security framework, aligned with WHO and NHM guidelines and ensures highest standards of data privacy.

SAMVITA has been developed to enable "Connected good healthcare Services through a value-chain to deliver effective quality care with safety and accuracy".

Salient features:

- Integrated with FDA / CE and ICMR approved devices.
- On-Spot, user-friendly primary health vital check platform
- Supports 69 test parameters, quick results with analysis (in addition with blood analysers)
- Battery operated, Portable Tele-kit with Live-Video consultation
- Hand-carry with a locking system to avoid misuse
- Easy to carry, compact - weighs around 3kgs only.
- Multiple devices integrated into one briefcase & easy to maintain
- User-friendly workflow; can be operated by semi-skilled resource with minimal orientation

SAMVITA is also used by Indian Medical Association (IMA) at COVID Care Centers, Airports, Government and Private Hospitals, NGOs, Corporate Companies, and Wellness Centers.
